

The Foundation for New Education Initiatives, Inc.

Bringing Wireless Technology to the Classroom

Description: Through the community-wide “Give Kids the World — A World of Technology” campaign, the Foundation aims to raise \$7 million for wireless technology improvements in schools, **to be matched 10 to 1** through the federal E-Rate Program. Every school in the District qualifies for the federal matching funds and would benefit from upgraded wireless technology. The campaign will promote teaching and learning in digital classrooms where traditional books are replaced by various forms of electronic media. **Fund-raising goal: \$7 million. Estimated return: \$70 million.**

Objective: To secure matching funds available from the federal government to fund wireless technology improvements in public schools.

Your contribution will help give our students the world through wireless technology.
